OBJECTIVE

To enhance my professional skills, capabilities and knowledge in an organization which recognizes the value of hard work and trusts me with responsibilities and challenges.

EXPERIENCE

2021 - 2023

- **Trainee Software Engineer**
Aress Software and Education Technology

  - Developed next generation integration platform for internal applications on Dynamic 365 business central

  - Handled scripting tasks for debugging and automation.

  - Wrote clear, clean code to develop AL Business central extensions.

  - Tested new applications for usability and adherence to code plan.

2020 - 2021

- **Software Developer Intern**
Infogalaxy Computer

  - Supported development, QA and user experience staff to develop new products.

  - Learned software engineering process improvements and best practices.

  - Developed business central project using AL programming language.

EDUCATION

2021

- **Engineering in information technology**
MET institute of engineering
7.5

2018

- **Diploma in computer science**
Maharashtra State Board of Technical Education
82%

SKILLS

- Dynamic 365 Business Central
- AL Programming
- SQL
- C#
- Application Development

PROJECTS

- **Reservation Specification**

  Developed an Business central extension to provide a screen that allows users to filter sales orders and allocate available inventory to orders where no reservations are currently in place. Additionally, an option should be provided for removing allocations if they exist.

- **Reverse Shipment**

  Implement an extension for reverse posted shipment into the process that the user can activate.
  Automate the following steps e.g. ·

  - Process the invoice creation with correction and credit creation linked to this invoice
  - Create a new sales order for the same details as the original order with Specific considerations
  - The new order must contain all the same header information as the original. In addition, the line details were replicated in order to reproduce only those lines that were part of the order i.e. the specific lines and quantity prior to shipment.
  - Effectively this copy order will have the lines on it that were closed when the original order was shipped so that they can then be processed again.

- **Post Pick Automation**

  Developed Business Central extension to automate the creation of posted shipments for multiple sales orders

  - Using the standard Business Central Inventory Pick list screen.
  - There will be a new button on the inventory pick list screen called "Post Pick", which will create a posted shipment for each line picked

- **Business Central Alerts**

  Implement a Business Central extension to trigger emails to internal and external recipients based on scenarios.

  - Send emails on the creation of sales and purchase orders.
  - Send emails to ensure that outstanding sales orders are reported daily and monthly etc.
